

**Good afternoon.**

My name is Antoine Graftio, I for a long time engaged in the creation of electronic experimental music. At this stage, I have been involved in three major projects: THEORY, Sacris Tandem, Conjunction.

THEORY is my personal project, under which I write experimental, electronic music in different directions and genres. This depressing monotonous music with philosophical overtones.

The project entitled Conjunction is joint work with my good friend and even, perhaps, a friend of Yaroslav Shamraev. In this project, an album dedicated to the English artist and part-schizophrenic Louis Wayne was released, which is utterly in other matters, as well as Yaroslav loved seals.

Sacris Tandem is a fundamental and global project, which is being implemented jointly by the two parties, it's me and my old childhood friend Alexei Shilov audience he is known to work in groups and COLD DESIGN Order Of Victory.

We return to the primordial origins of music and cut off all the excess trappings that only distracts the listener from the essence. All people who know such a thing as musical literature, it is clear that music has its roots in the rituals of our ancestors, and all the rest as they say from the evil one. Work on the next album will begin in a couple of months since its implementation, we need to buy some ethnic instruments.

At the beginning of his career, I spoke directly under its own name and surname Antuan Graftio.

Now at some tracks, I can also put your initials as the designation of the copyright, but as a rule, this applies to those works that do not fit on the concept to any of the above projects.

**Full list of releases looks like this:**

My first releases came out in 2005 on the Polish label called Far from showbiz, to my great regret, the organization ceased to exist.

<https://www.discogs.com/label/55380-Far-From-Showbiz>

There were such albums as:
