DJ MISS FTV FUTURISTIC TOUCH VISION

« We are standing in a doorway to the future, without even realizing it. Feelings are mixed in their synergies and generate new and more subtle forms. Sensations become thinner, and i deeply believe, that everyone is able to see colors of the music, its visualization, the sound of lights and forms. I devote my project to those, who are on the wave with future.»

FUTURISTIC TOUCH VISION

*- Touch screen - translucent, with both sides, the panel of 42 inches, working in the mode of multi-touch (two or more touches), which allows using a unique interface to mix the tracks. The uniqueness of the installation is that it fully replaces the CD-players and DJ-console, as well as provides the opportunity, the audience observe the process of selecting tracks, information, and overlay effects, the entire process of creating DJ-set in every detail.

Music is in my fingers, created on a huge, transparent touch screen («FUTURISTIC TOUCH VISION», see more detail below) Truly draws you into the process of playing a disc jockey. For the first time you will be futured to the mystery of a DJ-set.
